CONTENTS

Colposcopy, Instrumentation and Steps in the Examination

Uses of Colposcopy

Normal Cervical Anatomy and Structure

Structural Abnormalities

Epithelial Cell Types: Squamous and Columnar Epithelium

Metaplasia and the Normal Transformation Zone

Abnormal Transformation Zone and its Colposcopic Mimics

Correlation and Triage of Cytology, Colposcopy and Histology in Squamous Disease

Satisfactory vs. Unsatisfactory Colposcopy

Case Studies in Correlation

Colposcopy During Pregnancy

Colposcopy of Cervical Condylomata

Colposcopy of Cervical Polyps, Cysts, Fibroids, Microglandular Hyperplasia, DES, etc.

Colposcopy of Glandular Disease - AIS and Adenocarcinoma

Colposcopy of Cervix after Treatment and Persistent Disease

Colposcopy of Vulva, Vagina and Adjacent Sites in Benign, Premalignant and Malignant States

Eleven Case Studies: Recognizing Colposcopic Patterns
