

CARBON DIOXIDE LASER SURGERY FOR LOWER GENITAL TRACT DISEASE

**WITH 246 FRAMES (SCHEMATICS, TEXT, COLPO-
AND MACROPHOTOGRAPHS)
IN A POWERPOINT® PRESENTATION ON CD-ROM*
by V. Cecil Wright, MD
\$100.00 USD**

**Microsoft® Powerpoint® program not required to view CD-ROM*

CONTENTS

Basic laser physics

Components of a laser

Characteristics of the laser beam

Optical systems

Spot diameter, area and power density

Understanding high energy per pulse

Instrumentation

Biological effects and surgical principles

Safety

Techniques for cervical intraepithelial neoplasia, vaginal intraepithelial neoplasia, vulvar intraepithelial neoplasia and condylomata including vaporization, excision and combination procedures

Management of bleeding and complications

Patient instructions and postoperative care
